

# Technical Data Sheet:

## #PG-925

### 8.0mil Matte White Polypropylene BOPP Synthetic Paper

PG-925 is an 8.0 mil matte white biaxially oriented polypropylene (BOPP) synthetic paper that is specially formulated with a coating on the backside to force the print media to lay flat on both sides. In addition, PG-925 has good tear resistance, water resistance, and its microporous top coating gives it the ability to produce a rich, accurate color. This product can be used in aqueous (pigment and dye), latex, and UV-curable wide format digital printing. Common applications for PG-925 include: indoor banners, posters, short term outdoor signage, and POP/retail signs.

| Product Number                              | #925  |
|---|---|
| <b>Film</b>                                 |   |
| Film Type                                   | White Biaxially Oriented Polypropylene (BOPP) |
| Finish                                      | Matte   |
| Film Thickness (mils)                       | 8.0   |
| Film Weight (gsm)                           | 120   |
| Gloss (60°)                                 | 4   |
| Opacity (%)                                 | 96  |
| Brightness                                  | 108 (ISO Blue Whiteness)                      |
| Whiteness                                   | 136 (CIE Ganz)                                |
| <b>Environment</b>                          |   |
| Indoor Durability                           | Up to 1 year                                  |
| Outdoor Durability                          | Up to 6 months                                |
| <b>Applications</b>                         |   |
| ✓ POP/Retail                                | ✓ Banners and Posters                         |
| ✓ Outdoor (Short Term) & Indoor (Long Term) | ✓ General Signage                             |
