

Technical Data Sheet:

#PG-430

4.0mil High-Tack Paper Transfer Premask Application Tape (For Sign Vinyl)

PG-430 is a high-tack paper application tape that is 4.0 mil in thickness and is used for vinyl graphics used in sign making, screen printing and surface protection. This product consists of a self-wound, standard grade saturated backing coated with a specially formulated latex pressure sensitive adhesive. PG-430 is specially designed for use with vinyl and polyester films and hard-to-handle graphics like small legends. PG-430 transfer application tape is static free for transfer ease, has a high tack adhesion level, helps you minimize errors in applying graphics, and leaves no adhesive residue behind.

Product Number	#430
Film	
Film Type	Paper
Total Thickness (mils)	4.0
Adhesive	
Adhesive Type	Water-Based Natural Latex
Backing	
Backing Type	White Translucent Latex Saturated Paper
Environment	
Steel Adhesion	15 oz/in
Tensile Strength	20
Elongation	2.4%
