

Technical Data Sheet:

#PG-762

5.0mil Gloss Translucent White Polyester Film (Screen Positives/Negatives) (Dye Ink Only)

PG-762 is a 5.0 mil gloss translucent white polyester film. PG-762 is a premium alternative to photopaper with its wide color gamut, low dot gain, and high gloss finish. With the additional advantages of tear resistance and its lay-flat properties, PG-762 is ideal when a thinner base is desired, but light blocking is not required. This product can be used in aqueous (dye ink only) wide format digital printing. Common applications for PG-762 include: pop-up banners, tradeshow displays, high-end photographic prints, and other signage.

Product Number	#762
Film	
Film Type	White Translucent Polyethylene Terephthalate (Polyester/PET)
Finish	Gloss
Film Thickness (mils)	5.0
Gloss (20°)	70
Opacity (%)	96
Whiteness	103
Brightness	92
Environment	
Outdoor Durability	Indoor Only
Applications	
✓ POP/Retail	✓ Trade Show Graphics & Pop-Up Banners
✓ Indoor	✓ High-End Photographic Prints
