

# Technical Data Sheet:

## #PG-992

### 2.2mil Fluorescent Cast Vinyl Film with Permanent Adhesive

PG-992 is a 2.2 mil fluorescent cast vinyl film with white acrylic permanent adhesive. PG-992 has excellent weedability and conforms optimally to flat surfaces. The fluorescent pigments used in these films often fade in direct sunlight, and therefore, it is suggested that if PG-992 is used outdoors, it should only be for short-term use (6 months or less). This product can be used in solvent, latex, and UV-curable wide format digital printing. Common applications for PG-992 include: short term exterior safety signage, promotional materials, high visibility applications, and POP/retail signage. Please note that the color options for PG-992 include: green, orange, pink, red, yellow, and blue.

| Product Number        | #992                           |
|-----------------------|--------------------------------|
| <b>Film</b>           |                                |
| Film Type             | Colored Cast Fluorescent Vinyl |
| Finish                | Fluorescent                    |
| Film Thickness (mils) | 2.2                            |
| <b>Adhesive</b>       |                                |
